Maintenance Schedule — Fill-in by Model

A one-page service calendar you fill in for YOUR car, then keep in the glovebox.

What this is

Every car is a little different. This sheet has no pre-filled intervals — instead, you look up the real numbers for your model and write them in. That way it matches your actual vehicle, not a generic guess.

How to use it (10 minutes, one time)

1. Write your car's year, make, model, and engine at the top.
2. Find your owner's manual (paper copy, or free PDF from the maker's website — search “yourmake owner's manual PDF”).
3. Look up the “recommended maintenance schedule” or “service intervals” chapter and copy the intervals onto this sheet.
4. Pick a good oil-change shop and note it at the bottom.
5. Paper-clip this to the glovebox and update the odometer box at each service visit.

Reminder: intervals vary a lot between models and even between trim levels (some engines are 10,000 miles, some are 5,000). Always copy the numbers **from your manual** — this printable just gives them a home.

Printing tips: print at 100% scale on regular paper. A damaged spot in the glovebox is fine — just print a new one. You can also fill it in on a tablet if your PDF app lets you type.

Maintenance Schedule — My Vehicle

Filled in from the owner's manual for my car. One page, glovebox-ready.

YEAR	MAKE	MODEL
ENGINE / TRIM (E.G., 2.5L 4-CYL FWD)		MANUAL FOUND AT (URL OR BOOK)

Service intervals — copied from my manual

Service	Every (miles)	Every (months, if listed)
Oil & filter change		
Tire rotation		
Engine air filter		
Cabin air filter		
Brake fluid check/change		
Coolant check/change		
Transmission fluid check		
Spark plugs		
Timing belt / chain (if your engine has one)		
Other (your own line)		

Tire pressure & sizes

RECOMMENDED PSI (DRIVER'S DOOR STICKER)	TIRE SIZE

Where I get service done

SHOP / DEALERSHIP	PHONE
MY MECHANIC (FOR BIGGER JOBS)	PHONE

Odometer log at visits

Date	Odometer (mi)	What was done	Next visit due at

Verify with your manual: re-check intervals after any major service, tire change, or if your driving is “severe” (short trips, extreme heat/cold, towing) — manuals list a separate severe schedule for that.
